

CAMPING

CALIFORNIA

NORTH PORTION

ABOUT THE MAP

The *CAMPING GUIDE TO NORTHERN CALIFORNIA* has been designed to incorporate the best features of locating each campground on the map, along with a detailed list of facilities and recreational features.

The Auto Club wishes to acknowledge its appreciation to Federal, State and local agencies whose cooperation aided greatly in the preparation of the Camping Guide.

In some cases, a representative of the Automobile Club has personally visited the campgrounds but it should be noted that the guide has been prepared for the convenience of members only and the indication of campgrounds does not represent a recommendation by the Automobile Club or an endorsement of services or policies of the campground operator.

Below is a breakdown of the map legend and symbols:

SEASON OPEN—Many lower elevation campgrounds are open year-round and are represented by the symbol **A**. Campgrounds found at higher elevations, however, are closed in winter due to adverse weather—in these cases, the approximate opening and closing months are shown (eg, 5-9), and all dates are inclusive.

CAMPsites AND TRAILER SPACES—The number appearing in each column represents the total number of individual units found in each campground. In the *Trailer Spaces* column, a number plus the letter **H** indicates that electric, water, or sewage hookups—or a combination of these—are available.

WATER—The symbol **P** indicates piped water, normally located at each campsite or at convenient locations throughout the park. Other sources of water (lake, river, spring, stream, and well) are represented by the symbol **O**.

TOILETS—In the more developed campgrounds, flush toilets (symbol **F**) are usually provided; however, the majority of campgrounds are furnished with pit or chemical toilets (**P**).

STOVES OR FIREPLACES, TABLES—These facilities are usually provided at each campsite.

SWIMMING AND FISHING—When indicated these activities are available at the campsite or within a 5-mile radius. In many swimming areas lifeguards are not on duty and individuals swim at their own risk.

Along with this map, the Automobile Club will be happy to provide maps and books about various recreation areas, as well as information on weather, road conditions, emergency roadside service, and many other services to help make your camping holiday a success. Please call on us.

CAMPING INFORMATION

Camping in California has become tremendously popular in recent years; at present over two million Californians annually enjoy its mountains, deserts, and beaches. Although camping modes have changed considerably (not long ago only tents were found in campgrounds, but now tent trailers, camper pickups, and travel trailers are a common sight), the purpose—"to get away from it all"—remains the same.

The numbered campgrounds shown on the face of this map in the following recreation areas can all be reached by automobile: National Parks ■, State Parks ●, Forest Service ▲, State Forests ◆, County ●, City or Special District ▲, Corps of Engineers ★, Bureau of Land Management △, and privately-owned campgrounds □ that are open for public use. Numbered campgrounds followed by a letter (35A) are new campgrounds.

RESERVATIONS: State Parks accept reservations year-round; however, reservations must be made no more than 90 days prior to the camping date. Reservations may be made through the Automobile Club or by writing directly to the state park. Most private campgrounds, excluding Pacific Gas & Electric campgrounds, also accept reservations, which may be made by writing directly to the campground. National Parks, Forest Service, County, Corps of Engineers, and Bureau of Land Management campgrounds do not accept reservations. Organizations may make reservations for Forest Service Group Campgrounds.

TRAILERS: Most campgrounds will accommodate vacation-type trailers up to 22 feet. Electric, water and sewer hookups are found at many private campgrounds and at a few state and county campgrounds.

MAXIMUM CAMPING TIME: *National Parks and Monuments*—7, 14, or 30 days; *State Parks*—7, 10, or 15 days; *Forest Service*—7, 10, or 14 days; *Corps of Engineers*—14 days; *County*—14 or 21 days; *Private Campgrounds*—usually no limit.

FEES: *National Parks and Monuments, National Forests*—In any Federal recreation area that has an entrance fee, admission is covered under a short-term permit. Depending on the particular area, the short-term fee can be either \$1.00 per day, or \$3.00-\$5.00 for a designated time period not to exceed 6 months. The short-term permit covers the purchaser and anyone accompanying him in a private non-commercial vehicle; each person entering the Fee Area by any other means must pay 50¢ per day. User fees for certain well-developed facilities may be levied as well. *State Parks*—Fee for entrance and use of facilities ranges from \$1.00 to \$3.50 depending on facilities provided. *County and Privately-Owned Campgrounds*—Fee varies according to area.

FIRES: In designated campsites fires are permitted only in stoves or fireplaces, and use of fallen wood is prohibited. *National Forest*—fire permits sometimes required.

WATER: Unless from pipe or spring, drinking water should be boiled before use, due to possible contamination.

PETS: Pets are permitted overnight in most campgrounds, if they are leashed.

Johnny Horizon says:

This Land is YOUR Land

KEEP IT CLEAN!
